Donnie Meeker (Sweet Blindness)

Hey James, Listened to two of your CDS on the way down to Texas; both really really good James and the acoustic one I thought was phenomenal, both in picking and singing. James I believe you would have been a star a long time ago in the USA.

Some days ago I was giving a look at the playlists of my radio show of American roots music here and found that some of them also featured your latest album, the very good **Some people Get it!**

I really enjoy playing your music, it makes me think like Steely Dan playing the blues, it is subtler than usual and very well played and arranged indeed
